KEY SKILLS

AI workflow automation

n8n cloud, OpenAI API integration, conversational agent prompt design.

E-commerce operations

Multi-channel inventory and order coordination across six platforms.

Process improvement

Root-cause diagnosis and upstream-fix implementation in retail supply chains.

Data workflow design

Google Workspace, single-source-of-truth Sheet schemas.

LANGUAGES

Thai Native

English Professional working

PROFESSIONAL SUMMARY

Second-year BBA student at Macquarie University and the digital operations lead at CHAN NEUNG, my family's premium Thai fruit brand. I run a 24/7 AI ordering bot on Facebook Messenger, keep stock and listings in sync across six online channels, and chase supplier and quality problems before they reach the shelf. Looking for graduate roles in retail, e-commerce, and digital operations where this kind of practical work matters.

EXPERIENCE

Digital Operations & AI Automation Lead

Feb 2025 – Present

CHAN NEUNG · Premium Thai Fruit Brand (Fresh & Dried Marian Plum and Seasonal Fruits) · Bangkok, Thailand

- Designed and shipped a 24/7 AI ordering agent on Facebook Messenger using n8n and OpenAI. The bot handles order intake, address capture, shipping label PDF generation, and order logging without staff input.
- Led the shift away from a retail model with 20+ Bangkok mall branches (Siam Paragon, EmSphere, ICONSIAM-class) toward an online-first approach across six channels: Shopee, Lazada, TikTok Shop, LINE OA, Facebook, and Instagram.
- Manage the day to day at one Bangkok urban branch alongside the online channels, coordinating stock, suppliers, and shop staff across the fresh and dried product lines.

Cafe Operator, CHAN NEUNG Café

2024 – 2025

Ban Na, Nakhon Nayok, Thailand

- Ran a small CHAN NEUNG cafe in Nakhon Nayok for around 14 months, serving coffee, bakery, and food alongside a working farm and flower field that pulled in roughly 50 weekend visitors at peak.
- Handled the day to day work: menu, suppliers, a team of 3, and visitor flow across the cafe and the outdoor photo spots, before stepping back at the end of 2025 to focus on full-time study in Sydney.
